DISCIPLINES / SPECIALTIES

Applied agricultural research
Market analysis
Crop feasibility assessment
Environmental analysis

EDUCATION

M.S., Horticulture, Washington State University

B.A., Environmental Studies focused in sustainable food & farming, University of Montana

Aidan Kendall

Research Economist

Summary of Experience

Aidan is an agricultural specialist with academic and practical experience in applied agricultural research, specialty crops, organic crop production, and environmental issues. For diverse projects, Aidan conducts stakeholder engagement, provides data collection and analysis, and does geospatial analysis. Aidan has experience collecting market demand and supply data for agricultural products, analyzing the environmental benefits of agricultural conservation practices, and evaluating the economics of crop production and agricultural enterprises.

Aidan has a bachelor's degree in Environmental Studies focused in sustainable food and a master's degree in horticulture from Washington State University.

Example Experience

- Montana hop market analysis, *Headwaters RC&D, MT*
- Oregon organic market analysis, *Business Oregon, OR*
- Oregon payment for agricultural conservation practices, *Oregon Agricultural Heritage Program, OR*
- Feasibility of relocation options for Western Montana Growers Cooperative, *Western Montana Growers Cooperative, MT*
- *Published Research:*
    - Galinato, S.P., **A. Kendall**, and C.A. Miles. 2022. Costs and profitability for mechanized pruning and harvest in two cider apple orchard systems. HortTechnology 32(3):275–287. https://doi.org/10.21273/HORTTECH04964-21
